

## Control system for HIBLOW airpumps **AIRTRONICS**

AIRTRONICS controls FC blowers to provide flow volume adjustment, and insure constant flow output when inlet supply pressure fluctuates.

### QH Performance curve when voltage is specified with AIRTRONICS

\* All characteristics values are only for reference, and are not guaranteed values.  
\* Note that the operating temperature for our pumps is 41°F(5°C) to 104°F(40°C).
